

UCSI HOSPITAL, part of the UCSI Group, stands out as a significant healthcare provider in Malaysia with several unique features that distinguish it from other hospitals in the region:

- **American-Designed:** Tertiary-Level Hospital: UCSI Hospital is designed based on American hospital standards, ensuring a modern and comprehensive approach to healthcare delivery.
- **Fully Equipped for Advanced Care:** As a fully tertiary service hospital, it is equipped with full emergency and ICU services, catering to a wide range of medical needs and emergencies.
- **Large Capacity:** The hospital has a substantial capacity, initially opening with 130 beds but with a plan to expand to 500 beds as part of its ongoing development. Eventually, it aims to become a 1000-bed facility, making it one of the largest hospitals in the region.
- **Rakyat Wing Availability:** Unique in Malaysia, UCSI Hospital offers a *rakyat* wing. This wing provides the same level of treatment and care by the same doctors available in the private sections of the hospital but at a lower cost. The reduction in cost is achieved by removing premium services, thereby making quality healthcare more accessible and affordable for a broader range of patients.
- **Strategic Location and Accessibility:** Located in Bandar Springhill, Negeri Sembilan, near Kuala Lumpur International Airport (KLIA), UCSI Hospital is strategically positioned to serve both local residents and international patients.
- **Dedication to Healthcare Excellence:** The hospital is committed to raising healthcare standards and providing a positive patient experience. It is also recognised for its collaboration with various organisations and embassies to promote healthcare services and training.
- **Role in Education and Research:** Aspire to be the first teaching hospital, UCSI Hospital is closely linked with UCSI University, contributing to medical education and research, which helps in staying at the forefront of medical science and patient care.

UCSI HOSPITAL'S **RAKYAT WING**

Quality Healthcare at
Affordable Prices

 **UCSI Hospital**

Your Health Comes First

PIONEERING EXCELLENCE

in Healthcare

UCSI Hospital stands as a beacon of medical excellence in Malaysia. With state-of-the-art facilities and a team of dedicated healthcare professionals, we provide comprehensive care across various specialities.

Our commitment to innovative treatments and compassionate care has established us as a preferred private healthcare institution.

RAKYAT WING: BRIDGING THE GAP IN HEALTHCARE ACCESSIBILITY

The *Rakyat Wing*

at UCSI Hospital is a groundbreaking initiative designed to extend quality healthcare services at significantly reduced costs. We offer the same high standard of care, facilitated by our esteemed medical professionals, at prices up to 40% cheaper than regular services. This initiative underscores our commitment to making healthcare accessible to all Malaysians, particularly in the Port Dickson area.

Key Features:

Affordable Prices

Up to 40% cheaper than regular services

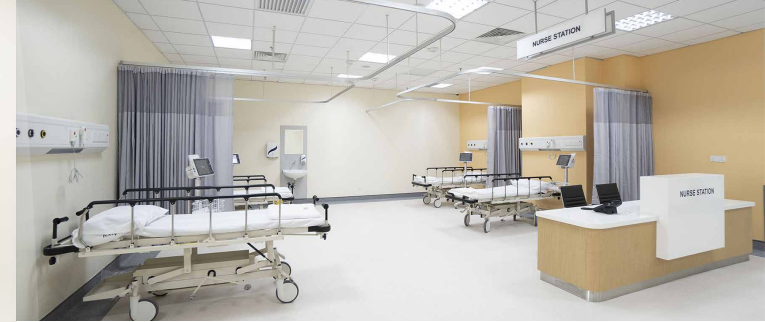

Quality Care

Same experienced doctors and standard treatments

Designed for You

Focused on serving the Malaysian community

- **UCSI Hospital *Rakyat Wing* is exclusively available for:**

- **B40 Category:** Families categorised within the lower 40% income group in Malaysia.
- **M40 Category:** Extending our services to those in the M40 category, specifically up to the M2 level, with household incomes not exceeding RM 7,600 per month.

- **Payment Method:** We accept payments through cash or credit card. Please note that UCSI *Rakyat Wing* services are not covered under insurance policies.

- **Room Arrangements:** Comfortable shared rooms accommodating either four to six patients, equipped with essential amenities for a pleasant stay.

As part of our commitment to the future of healthcare, we allow medical students to visit and learn from real-life medical scenarios. This educational aspect is a key feature of our public wing, offering a dynamic learning environment for the next generation of healthcare professionals.
