

Bronchoscopy Package

Do you experience prolonged cough, breathing difficulties, coughing out blood or large amount of phlegm, chest pain/tightness, wheezing, or noisy breathing?"

These could suggest a variety of respiratory problems and you should get yourself checked!

What is Bronchoscopy, and how does it work?

Bronchoscopy is a procedure that allows a doctor to look into the lungs and airways. It can be used for both diagnostic and therapeutic purposes.

Some common reasons that necessitate a bronchoscopy procedure include:

- 01** Determine the cause of the unexplained chest pain.
- 02** Determine the cause of the chronic cough. It helps look for obstructions in airways or lung collapse.
- 03** Examine any abnormalities detected on a chest X-Ray or CT Thorax film.

UCSI Hospital's package includes:

- Bronchoscopy Day Care Fees
- Bronchoscopy Procedures Fees
- Medical and Surgical Consumables

RM2,400
