SPRINGHILL, LUKUT.

YOUR HEALTH COMES FIRST

# BREAST & ENDOCRINE FELLOWSHIP AT UCSI HOSPITAL

UCSI Hospital is a leading healthcare institution in Malaysia that offers high-quality medical care across primary, secondary, and tertiary services. The hospital, renowned for its state-of-the-art facilities and patient-centered approach, is committed to achieving excellence in medical treatment, innovation, and education. As a teaching hospital, UCSI Hospital fosters the development of future healthcare professionals through fellowship programs in specialised fields like cardiology, cardiac surgery, orthopaedics, and breast and endocrine surgery, solidifying its role as a hub for medical excellence and professional growth.

Fellows at UCSI Hospital benefit from one-on-one mentorship by seasoned experts from the UCSI Research Committee, guiding them through every stage of research, from study design to publication. This personalized training equips fellows with rigorous research skills, with each fellow aiming to publish a well-executed research paper. Additionally, some fellowships conducted collaboratively with other universities and hospitals enhance the experience with interdisciplinary learning, broader clinical exposure, networking opportunities, and joint research projects, further enriching the fellows' professional and academic development.

**TAN SRI DR. NOOR HISHAM ABDULLAH**

**Chairman of UCSI Healthcare Group,  
General, Breast & Endocrine Surgeon**

*The Breast and Endocrine Fellowship at UCSI Hospital under the guidance of **Tan Sri Dr. Noor Hisham Abdullah** is a prestigious training program designed for aspiring surgeons aiming to specialize in the management of breast and endocrine diseases.*

## Key Features of the Fellowship

### RENOWNED MENTORSHIP:

- **Tan Sri Dr. Noor Hisham Abdullah**, a globally respected breast & endocrine surgeon and former Director-General of Health in Malaysia, brings unparalleled expertise in endocrine and breast surgery, coupled with leadership in healthcare management.

### CLINICAL EXPOSURE:

- Extensive hands-on training in the diagnosis, surgical management, and multidisciplinary care of breast and endocrine disorders.
- Access to advanced surgical techniques.

### ACADEMIC AND RESEARCH OPPORTUNITIES:

- Active participation in clinical research under expert supervision.
- Opportunities to publish in peer-reviewed journals and present at national and international conferences.

### STATE-OF-THE-ART FACILITIES:

- UCSI Hospital provides cutting-edge medical equipment and technology, fostering a modern learning environment.

### MULTIDISCIPLINARY COLLABORATION:

- Interaction with radiologists, pathologists, oncologists, and other specialists as part of a comprehensive care team.
- Exposure to multidisciplinary tumor board meetings for case discussions.

### PROFESSIONAL DEVELOPMENT:

Provides targeted training for professional growth.
